Android Game for Alzheimer's Disease Detection:
This was developed for the finals of the software edition of "Smart India Hackathon - 2020". This was a team project consisting of 6 members.

Challenges Faced:
- Drag and drop feature for sequence of activity
- Maze implementation difficulty was overcome with matrix approach solution
- Timer feature for the whole module was overcome with an activity timer.

Outcome:
- This was able to detect the early stages of Alzheimer's disease.
